Index of Exercises

Exercise #	Description	Page #
1.1	Creating and Managing Virtual Directory	85
1.2	Using Reflection to Find Information About the Page Class	86
1.3	Using MSIL Disassembler (ildasm.exe)	88
2.1	Finding the click position in an Image	192
2.2	Registering Client-Side Script	193
2.3	Using the Xml Control	194
2.4	Change Password Screen	194
2.5	Using the HyperLink Control	196
3.1	Using Session State to Create a Shopping Cart	270
3.2	Creating a Wizard-like User Interface	271
4.1	Emailing Unhandled Exceptions	320
5.1	Using Simple Data Binding to Display Information from an Array	396
5.2	Use Simple Data Binding to Display Information From a Database	398
5.3	Use Complex and Simple Data Binding With a DropDownList Control	400
5.4	Create a Master-Detail Data Form on the Form screen, leave all columns in both	401
5.5	Using a DataView Object to Filter Data at Runtime	401
5.6	Use SelectedIndex in a DataList Control	403
6.1	Preselecting Data by Using Parameterized Stored Procedures	538
6.2	Transferring Database Data to a Disk File	539
6.3	Using Transactions with ADO.NET	541
7.1	Events from a Composite Control	610
7.2	Getting Types in an Assembly	612
8.1	Calling a Web Service Asynchronously	648
9.1	Using Localized Calendars	685
9.2	Retrieving Region Information	686
10.1	Finishing the Conversion	728
11.1	Using Tooltips for User Assistance	758
11.2	Row and Column Headers for Tables	758
12.1	Creating Custom Trace Switch	827
12.2	Debugging SQL Server Stored Procedures Using Visual C# .NET	828
12.3	Setting Conditional Breakpoints Using Visual C# .NET	830

Exercise #	Description	Page #
13.1	Using Microsoft's Sample .NET Framework Bootstrapper	921
13.2	Creating Database Script During Installation	922
14.1	Getting Module Information for a Process	972
14.2	Getting Performance Information	974
15.1	Performing Variable Caching Programmatically	1038
15.2	Implementing File-based Dependencies for the Items in Data Cache	1038
